

PROBLEM STATEMENT FRAMEWORK

A well-formed problem statement anchors your entire solution. It names a real user, captures their emotional experience, and is specific enough that a stranger could understand exactly what is broken and why it matters. Use the format below.

TEMPLATE FORMAT

A

user with a role

 feels

emotion

 about Tea Fellas'

current situation or method

 and needs to

reach the goal

 but cannot do so because

the friction or barrier

, which has

impact on their life or the business

.

Tip: A strong problem statement names multiple users (e.g., "Aunty Mary, Darren, and Uncle John") when they share the same friction. It also names the impact in concrete business terms — not just "frustrating" but "daily order errors" or "an operational ceiling that prevents scaling."

PRIMARY PROBLEM STATEMENT (FRONT-LINE OPERATIONS)

Primary Statement

Focus on the internal team — Mary, Darren, John — and the operational breakdown in the order fulfilment process.

SECONDARY PROBLEM STATEMENT (CUSTOMER EXPERIENCE)

Secondary Statement

Focus on the customer-facing experience — Mrs Selva, Jacky — and what they cannot do today.

SUPPORTING EVIDENCE

List 3 pieces of evidence from your research that justify these problem statements.
