

C — Consolidate

Bring overlapping or duplicated steps into a single streamlined flow

A — Automate

Identify manual or repetitive steps that technology can take over

R — Reduce

Simplify steps that add friction but contribute limited value

E — Eliminate

Remove steps entirely that no longer serve a purpose with the new solution

CARE ANALYSIS

Current Process Step	Current State Problem	CARE Action	Recommendation
Customer states order verbally to Mary	Mary handwrites chit under pressure		
Mary writes chit, passes to Salmiah; Salmiah re-keys into system	Double data entry; errors compound		
Salmiah prints sticker label from her keyed input	Manual label printing per order		
Darren reads sticker label + paper chit	Two sources of truth; unclear chits interrupt		
John calls customer name from memory	Noisy, unreliable, wrong drink to wrong customer		
John matches drink to customer from memory	No physical tracking; relies on recognition		
Mary issues paper loyalty stamp cards	Cards lost, forgotten, no digital record		
Mary manages loyalty redemption complaints	Manual, daily, time-consuming		
Jacky verbally recites 5–6 orders at counter	Error-prone, slow, label confusion at collection
