

Identify the key risks for your recommended solution. Plot each on the matrix (1=Low, 5=High for both axes). Then complete the risk register below with likelihood, impact, and mitigations.

Probability × Impact Matrix

← Probability (1 Rare → 5 Almost Certain) →

Probability

1

2

3

4

5

Impact →

High (12+) Medium (6-11) Low (1-5)

Plot your risks as numbered circles (1, 2, 3...) in the correct cell
